TASK 3: Control Flow Based Student Result System

Tools:

- Primary: IntelliJ IDEA
- Alternatives: Eclipse, VS Code

Hints / Mini Guide:

1. Design a student result processing system that takes marks as input.
2. Use if-else and switch statements to assign grades.
3. Implement validation logic for marks range.
4. Use loops to allow multiple student entries.
5. Apply break and continue statements where needed.
6. Display final result summary with percentage and grade.
7. Refactor repeated logic into methods.
8. Improve readability using proper indentation and naming.

Deliverables:

- Console-based result processing system
- Sample test cases output

Interview Questions Related To Above Task:

- Difference between if-else and switch?
- When to use break?
- What is loop control?
- Explain nested loops.
- How do conditions affect program flow?

📌 **Task Submission Guidelines**

- ⏰ **Time Window:**

 Youcan complete the task anytime between 10:00 AM to 10:00 PM on the given day. Submission link closes at 10:00 PM

- 🔍 **Self-Research Allowed:**

 Youare free to explore, Google, or refer to tutorials to understand concepts and complete the task effectively.

- 🛠️ **Debug Yourself:**

 Tryto resolve all errors by yourself. This helps you learn problem-solving and ensures you don't face the same issues in future tasks.

- 💸 **No Paid Tools:**

 Ifthe task involves any paid software/tools, do not purchase anything. Just learn the process or find free alternatives.

- 📁 **GitHub Submission:**

Create a new GitHub repository for each task.
Add everything you used for the task — code, datasets, screenshots (if any), and a short README.md explaining what you did.

📤 **Submit Here:**

 After completing the task, paste your GitHub repo link and submit it using the link below:
