Conclusion

1. Setup & Configuration

```
git config --global user.name "Your Name"
```

- Sets your name for commits.
- **Use when:** Setting up Git for the first time.

```
git config --global user.email "you@example.com"
```

- Sets your email for commits.
- **Use when:** Configuring Git identity.

```
git config --list
```

- Shows all current Git configurations.
- **Use when:** You want to verify your setup.
