

Task 7: Add JavaScript DOM Manipulation

Tools:

- Primary: VS Code, Browser DevTools
- Alternatives: CodePen

Hints / Mini Guide:

1. Create a script.js file and link it correctly.
2. Select HTML elements using DOM methods.
3. Modify text and styles dynamically.
4. Handle button click events.
5. Toggle classes using JavaScript.
6. Add comments explaining logic.
7. Debug using console logs.
8. Test in multiple browsers.

Deliverables:

- Interactive web page
- Dynamic content manipulation

Interview Questions Related To Above Task:

- What is DOM?
- How do events work in JS?
- Difference between querySelector and getElementById?
- What is event bubbling?
- Why is JS loaded at the end?

📌 Task Submission Guidelines

■ 🕒 Time Window:

You can complete the task anytime between 10:00 AM to 10:00 PM on the given day. Submission link closes at 10:00 PM

■ 🔍 Self-Research Allowed:

You are free to explore, Google, or refer to tutorials to understand concepts and complete the task effectively.

■ 🛠️ Debug Yourself:

Try to resolve all errors by yourself. This helps you learn problem-solving and ensures you don't face the same issues in future tasks.

■ 💰 No Paid Tools:

If the task involves any paid software/tools, do not purchase anything. Just learn the process or find free alternatives.

■ 📁 GitHub Submission:

Create a new GitHub repository for each task.

Add everything you used for the task — code, datasets, screenshots (if any), and a short README.md explaining what you did.

📌 Submit Here:

After completing the task, paste your GitHub repo link and submit it using the link below:
