

TASK 10: Exception Handling & Custom Exceptions

Tools:

- Primary: IntelliJ IDEA
- Alternatives: Eclipse

Hints / Mini Guide:

1. Identify runtime exceptions.
2. Handle them using try-catch blocks.
3. Use finally block for cleanup.
4. Create custom exception class.
5. Throw exceptions manually.
6. Handle checked vs unchecked exceptions.
7. Add meaningful error messages.
8. Log exceptions properly..

Deliverables:

- Robust exception-safe program
- Custom exception class

Interview Questions Related To Above Task:

- Checked vs unchecked exceptions?
- Why finally block?
- What is throw vs throws?
- Custom exception use case?
- Exception hierarchy?

📌 Task Submission Guidelines

- 🕒 **Time Window:**

You can complete the task anytime between 10:00 AM to 10:00 PM on the given day. Submission link closes at 10:00 PM

- 🔍 **Self-Research Allowed:**

You are free to explore, Google, or refer to tutorials to understand concepts and complete the task effectively.

- 🔧 **Debug Yourself:**

Try to resolve all errors by yourself. This helps you learn problem-solving and ensures you don't face the same issues in future tasks.

- 💰 **No Paid Tools:**

If the task involves any paid software/tools, do not purchase anything. Just learn the process or find free alternatives.

- 📁 **GitHub Submission:**

Create a new GitHub repository for each task.

Add everything you used for the task — code, datasets, screenshots (if any), and a short README.md explaining what you did.

- 📌 **Submit Here:**

After completing the task, paste your GitHub repo link and submit it using the link below:
