

TASK 7: Inheritance & Polymorphism – Employee Payroll System

Tools:

- Primary: IntelliJ IDEA
- Alternatives: Eclipse

Hints / Mini Guide:

1. Create a base Employee class.
2. Extend it for FullTime and PartTime employees.
3. Override salary calculation methods.
4. Demonstrate runtime polymorphism.
5. Use super keyword effectively.
6. Store objects in parent reference.
7. Print payroll summary dynamically.
8. Explain Liskov Substitution Principle.

Deliverables:

- Payroll system with inheritance
- Output showing polymorphism

Interview Questions Related To Above Task:

- What is polymorphism?
- Method overriding rules?
- Difference between this and super?
- Can constructors be overridden?
- Why inheritance is useful?

📌 Task Submission Guidelines

- 🕒 **Time Window:**

You can complete the task anytime between 10:00 AM to 10:00 PM on the given day. Submission link closes at 10:00 PM

- 🔍 **Self-Research Allowed:**

You are free to explore, Google, or refer to tutorials to understand concepts and complete the task effectively.

- 🔧 **Debug Yourself:**

Try to resolve all errors by yourself. This helps you learn problem-solving and ensures you don't face the same issues in future tasks.

- 💰 **No Paid Tools:**

If the task involves any paid software/tools, do not purchase anything. Just learn the process or find free alternatives.

- 📁 **GitHub Submission:**

Create a new GitHub repository for each task.

Add everything you used for the task — code, datasets, screenshots (if any), and a short README.md explaining what you did.

- 📌 **Submit Here:**

After completing the task, paste your GitHub repo link and submit it using the link below:
