

TASK 5: Arrays & Basic Data Analysis Program

Tools:

- Primary: IntelliJ IDEA
- Alternatives: Eclipse

Hints / Mini Guide:

1. Create an application that stores numerical data in arrays.
2. Perform operations like sum, average, max, and min.
3. Implement sorting manually without using built-in methods.
4. Demonstrate single-dimensional and multi-dimensional arrays.
5. Handle `ArrayIndexOutOfBoundsException`.
6. Use loops efficiently for traversal.
7. Display results in formatted output.
8. Comment logic clearly for understanding.

Deliverables:

- Data analysis console app
- Array processing output

Interview Questions Related To Above Task:

- Difference between array and `ArrayList`?
- How arrays are stored in memory?
- What causes `ArrayIndexOutOfBoundsException`?
- Explain multidimensional arrays.
- When not to use arrays?

📌 Task Submission Guidelines

- 🕒 **Time Window:**

You can complete the task anytime between 10:00 AM to 10:00 PM on the given day. Submission link closes at 10:00 PM

- 🔍 **Self-Research Allowed:**

You are free to explore, Google, or refer to tutorials to understand concepts and complete the task effectively.

- 🔧 **Debug Yourself:**

Try to resolve all errors by yourself. This helps you learn problem-solving and ensures you don't face the same issues in future tasks.

- 💰 **No Paid Tools:**

If the task involves any paid software/tools, do not purchase anything. Just learn the process or find free alternatives.

- 📁 **GitHub Submission:**

Create a new GitHub repository for each task.

Add everything you used for the task — code, datasets, screenshots (if any), and a short README.md explaining what you did.

- 📤 **Submit Here:**

After completing the task, paste your GitHub repo link and submit it using the link below:
