

Task 11: Create a Responsive Layout Using CSS Grid

Tools:

- Primary: VS Code, Browser DevTools
- Alternatives: CodePen, StackBlitz

Hints / Mini Guide:

1. Design a layout consisting of header, sidebar, main content, and footer.
2. Apply display: grid to the main container to activate CSS Grid.
3. Define rows and columns using grid-template-rows and grid-template-columns.
4. Place individual items using grid lines and named grid areas.
5. Use media queries to change grid layout for mobile, tablet, and desktop screens.
6. Ensure the content remains readable and accessible across all screen sizes.
7. Combine Grid with Flexbox inside components for better control.
8. Test responsiveness using browser device simulation tools.
9. Optimize spacing and alignment for real-world layouts.

Deliverables:

- Fully responsive grid-based layout
- Mobile-first design implementation

Interview Questions Related To Above Task:

- Difference between Grid and Flexbox?
- What are grid areas?
- What is responsive design?
- How do media queries work?
- When should Grid be preferred?

📌 Task Submission Guidelines

- 🕒 **Time Window:**

You can complete the task anytime between 10:00 AM to 10:00 PM on the given day. Submission link closes at 10:00 PM

- 🔍 **Self-Research Allowed:**

You are free to explore, Google, or refer to tutorials to understand concepts and complete the task effectively.

- 🔧 **Debug Yourself:**

Try to resolve all errors by yourself. This helps you learn problem-solving and ensures you don't face the same issues in future tasks.

- 💰 **No Paid Tools:**

If the task involves any paid software/tools, do not purchase anything. Just learn the process or find free alternatives.

- 📁 **GitHub Submission:**

Create a new GitHub repository for each task.

Add everything you used for the task — code, datasets, screenshots (if any), and a short README.md explaining what you did.

- 📌 **Submit Here:**

After completing the task, paste your GitHub repo link and submit it using the link below:
